EXPERIENCE

May 2024 - Current

Assistant Vice President (Analytics), J.P. Morgan Chase & Co. | Bengaluru

- Instrumental in the firm wide initiative of migrating reference data (400+ Mn data points) from legacy system to high tech platform that reduces infrastructure cost, vendor cost, and maintenance cost thereby streamlining the instrument data for downstream business functions.
- Assisted senior stakeholders in defining SLA for new process in Manila using frequency distribution technique and other statistical methodologies.

July 2022 - April 2024

Analytics Associate, J.P. Morgan Chase & Co. | Bengaluru

- Involved in planning and execution of various data analytics, data science and data engineering projects.
- Empower firmwide resilience by eliminating user tools, deploying control checks and fortifying processes against operational and reputational risks.
- Enhance process efficiency by migrating millions of data points from legacy to strategic systems, resolving data quality, tech, logic, and business rule issues.
- Transform financial analytics with Alteryx based apps that reduce dependency on Bloomberg terminals, generating cost benefit of **260K USD**.
- Facilitated the HR teams and management to get a holistic view of the hiring status across Asset & Wealth Management teams by building an interactive tableau dashboard.
- Identified sentiments of general public of JP Morgan across Diveristy, Equity & Inclusion by building an NLP (Natural language Processing) model.
- Helped the firm in moving towards cloud adoption by establishing Alteryx connectivity to snowflake and Amazon S3 Bucket (Avro file)
- Saved a staggering **~5500 manual processing hours** with partnership and collaboration thereby increasing productivity and operational efficiency.
- As an analytics lead, a significant aspect of my role involves conducting interviews to assemble a dynamic and high performing analytics team.
- Spearheaded comprehensive people engagement activities and models within the team by establishing a 3 pillar framework.

July 2020 - June 2022

Analyst (Project Management), J.P. Morgan Chase & Co. | Mumbai

- Built a forecasting model using model quantile and model percentile functions on Tableau for control and operational risk evaluation applications
- Collaborated with global risk managers, trade and sale assistants, tech partners across EMEA, US, HK for exception handling and break resolutions.
- Assisted in orchestrating and governing testing BoW. This included finalization of testing plans for period 2021 & beyond, aligning resource requirement and integrating efficiencies.
- Supported Pyramid to Athena migration, mitigating risk and setting up controls, analyzing trade booking methodology, tech issues, reconciliation and controls with datahub.
- Led program management via MyPM tool by collaborating with cross functional stakeholders.
- Played a critical role in managing projects by onboarding new applications for the smooth functioning of operations across Mumbai, Bournemouth & Manila.
- Created monthly presentations for senior management in Global Governance calls to present key strategies of the programs.
- Empowered training to various users across regions on Alteryx, Tableau and AI/ML foundation courses.
